Measurement: Converting Units

Top Number Fun Warm-Up Suggestions

The Measurement Conversion Song helps children learn and remember different conversions. In this video centimetres, metres and kilometres are explored.

This video is designed to help children learn and remember the square numbers up to 100. The video has a virtual Sergeant Major (Dave himself) who leads the children some Square Number Bashing!

Small Steps

1: Metric measures

The Measurement Conversion Song helps children learn and remember different conversions. In this video centimetres, metres and kilometres are explored.

2: Convert metric measures

Pirate Captain Hugh is giving Pirate Captain Bert some of his treasure as a birthday present. Bert has to convert between metres and kilometres in order to find the treasure. E.g. $1.2\text{km} = 1200\text{m} = 1\text{km } 200\text{m}$.

3: Calculate with metric measures

4: Miles and kilometres

Return to Hugh's Birthday Treasure Quest. Remind children of the challenge given by Hugh to Bert. Now create your own version of the story, with Hugh giving Bert the number of miles and he has to convert to kilometres (and vice versa)

Year:  6

Spring Week:  7

Measurement: Converting Units

5: Imperial measures

This video explores both metric and imperial measures. In the summary at the end of the video children are reminded of the key imperial measures and conversions that we use today.
